RE: Site Inspection, LaSal Junction Mill Site, S/037/069, San Juan County, Utah

Date of Inspection: May 1, 1992  
Time of Inspection: 1:00 p.m.  
Conditions: Sunny, warm, breezy  
Participants: Holland Shepherd, DOGM

I stopped briefly at the LaSal Junction Mill site on the way back to Moab during the Division's Lisbon Valley Reclamation tour. I had been informed earlier by a Division Board Member (Kent Stringham), that the operation had been shut down and reclaimed. This information was correct.

All mining implements, mechanisms and structures have been removed from the site. The process ponds have been removed, backfilled and regraded. All that remains are 3 sandstone ore piles situated in the yard.
